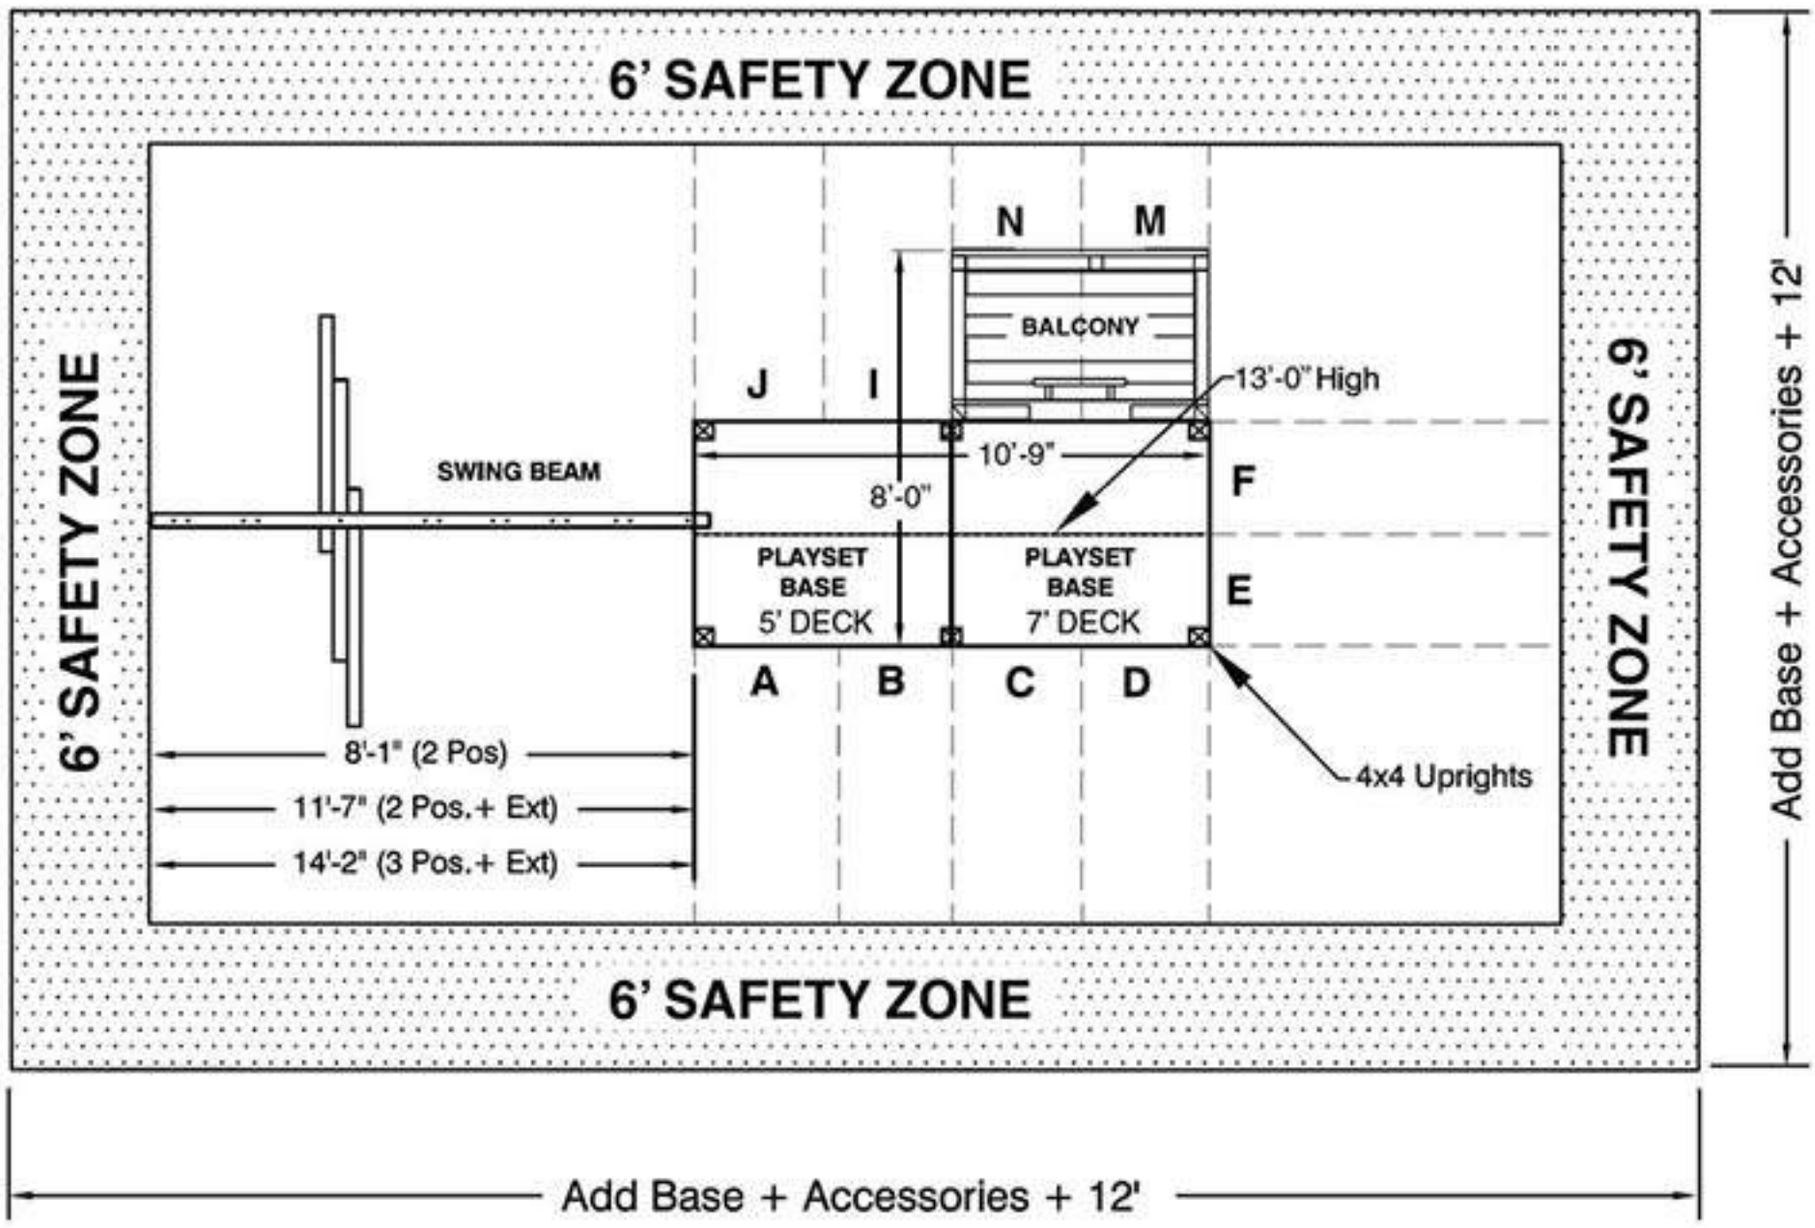
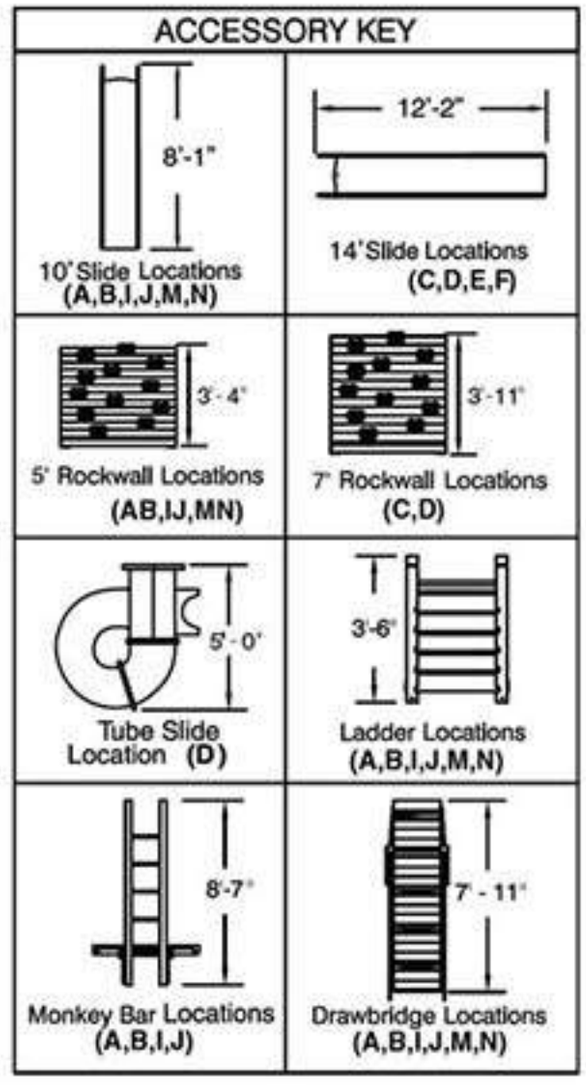
CUSTOM SAFETY ZONE CALCULATOR

- For safety a 6' safety zone is required on all sides of your playset.
- Due to the various locations playset accessories may be installed you need to determine the safety zone.




Step 1. Determine the location of each playset accessory.
Step 2. Using the Accessory Key add the measurement of each accessory to the base size shown to determine your playset size.
Step 3. Add 6' per side or 12' overall to the length and width of your playset. This is the area with safety zone required for your playset.
